

Best in class for your most demanding products

Optimizing yield and manufacturing efficiency during the industrial life of your drug

Unprecedented cosmetic performance reducing your reject rates to the lowest level

PPM Base for Most Critical Defects

- ▶ Critical defects: PPM + AQL 0,01
- ▶ Major defects: 0,04-0,25
- ▶ Minor defects: 0,4-1,0

Cosmetic Inspection

- ▶ 100% full surface automatic inspection / 200µm
- ▶ Spami Argo for vials

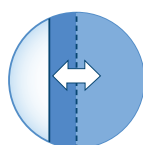

Reduce vial breakage risk during the industrial life of your drug

Superior Mechanical Resistance

- ▶ Limited Glass-to-Glass process
- ▶ Reduced dimensional tolerances

Special Treatments (external) - Optional

- ▶ External silicone
- ▶ Dimensional Inspection
- ▶ 100% camera

Increased compatibility between container and drug

Special Treatments

- ▶ Internal silicone distribution
- ▶ Lower alkalinity

Making your primary packaging easy to manage

Technical Customer Service Support

- ▶ Additional training and technical support for your launch

More proactive quality management by extended data collection, to be shared with you

Capability Informations

- ▶ Extended CoA

Reducing your business impacts linked to quality
