BALLERSTAEDT
... protecting your products

Aluminium heat seals and sealing machines

Global player -

We are supplier for the cosmetics, pharmaceutical, chemical and food industries.

BALLERSTAEDT manufactures aluminium heat seals and sealing machines.

For more than 65 years our customers have placed their trust in our know-how and innovative products to protect valuable cosmetics, preserve highly effective pharmaceutical products, safely package aggressive chemicals or preserve aromatic food items.

Our aluminium heat seals can either be firmly sealed or peelable as required, and can be easily removed without leaving any residue.

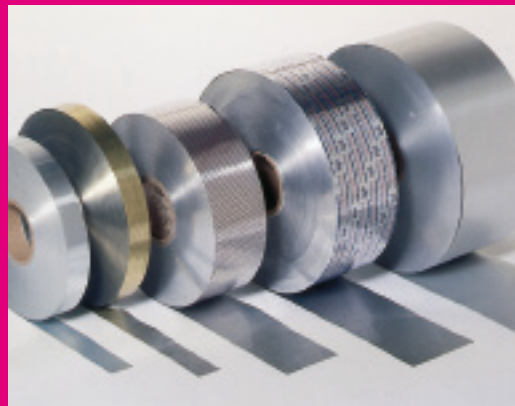

BALLERSTAEDT aluminium heat seals guarantee:

- **Tamper evidence**
- **Protection against light, oxygen, germs and external aromas**
- **Absolute tightness**

Tamper evidence -

aluminium heat seals in various shapes, colours and sizes.

We have the appropriate solution for every issue related to sealing containers.

BALLERSTAEDT manufactures heat seals for synthetic materials (PE, PP, PS, PET, PA), glass, lacquered tin and aluminium. We always have over 40 quality materials in stock, so that we can react quickly to our customers' needs as required.

We differentiate between flat aluminium boards which are particularly good for processing, deeply drawn seals that can be easily centred by hand, and one part induction cores, that are mainly used to finish the screw caps.

We supply the aluminium heat seals as pre-cut shapes or rolls. These can be embossed and printed, and are available in different sizes and shapes

*Potpourri of colours -
digital printing by BALLERSTAEDT.*

Do you want to position yourself in the market with individualised products?

Our new digital printing machine enables us to offer a special service. We can print your aluminium heat seals using innovative technology **individually, quickly, cheaply** and **precisely**.

Benefits that catch the eye

- no press tool or printing plate costs
- economical printing even for small print runs
- high print quality at high resolution
- no additional charges for multi-coloured printing
- individual labelling of particular heat seals
- solvent free, UV-hardening, odourless colours
- good resistance to heat and abrasion
- short delivery times and high flexibility

*Well filled, properly sealed -
sealing and filling machines for all needs.*

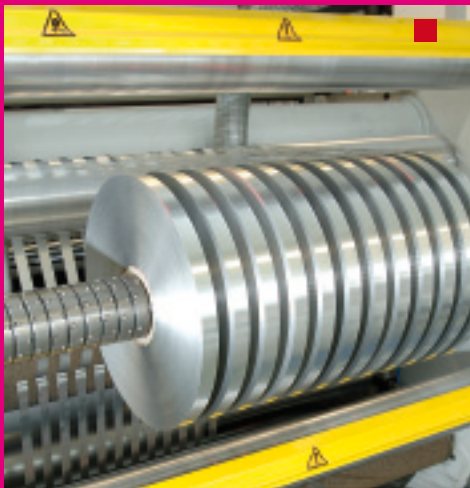

We offer our customers sealing machines and sealing equipment that meet their respective needs. Our equipment portfolio ranges from manual sealing machines to semi-automatic devices to fully automatic filling, sealing and closing equipment. We guarantee that our equipment is user friendly and easy to handle.

Systems

Service is our priority!

We supply international customers from the cosmetics, pharmaceutical, chemical and food industries worldwide. With our Total Sealing Management BaCo Seal Systems we can offer them an all-round service package. This includes the supply of aluminium heat seals and sealing machines together with comprehensive advice, targeted service and continuous quality control.

All Ballerstaedt products are "made in Germany". In order to live up to our high standards, we continually develop our portfolio and constantly invest in new and innovative tools and cutting and punching technology.

Our company has been certified in accordance with ISO 9001, ISO 14001, HACCP and AEO.

We are a forward-looking company. It goes without saying that we deal with resources and the environment in a careful and sustainable manner. That's why, for example, we already generate 70% of our required electricity from three modern solar power systems.
